introduce bias

BIAS

Inclination or prejudice for or against one person or group, especially in a way considered to be unfair.

UNCONSCIOUS BIAS

Bias that happens **automatically**, is outside of our control and is triggered by our brain making quick judgments and assessments of people and situations, **influenced by** our **background**, cultural environment and personal **experiences**.

Could you share with me a copy of the review checklist the architecture team used to ensure that our AI models are not racist or sexist?

Need data to feed the model

- ✓ Data can be biased
- ✓ Data labelers can be biased
- ✓ Engineers can be biased

- ✓ Need processes and policies
- ✓ Need quality assurance
- ✓ Need a diverse set of people

AI is not just an R&D topic
